## PROJECT SOLUTIONS

### Computer & Telecom

DATA Centers Project

UPS & Solar Power

Computer & Networking

Safety & Security

*We're MORE than just a Trading Company  
offering Quality Products & Services*

**24/07/365**

# Mission Statement

*Our mission is to develop cost-effective value engineering solutions meeting unique present and future business demands of our valued Customers by exploring best Quality Products and Services options tailored to pre-defined budgetary constraints of Customers.*

## GREETINGS

*Computer & Telecom Specialists (CTS) Management and Staff Team is grateful having honor of introducing ourselves to your esteemed organization.*

*Having a prominent position in the market , CTS has partnered with world renown Leading manufacturers to provide our valued customers with Quality Products and Systems for a long-term service. Our Customers consider us as a reliable solution provider for all their project requirements and after-sales support.*

*CTS specializes in tailoring Turn-Key Project Solutions for Data/ IT Centers, Telecom Centers and Language Labs etc offering Fiber Optic Systems, Power and Control Systems, UPS Systems, Batteries/DC Systems, Security/Access Control Systems, Fire & Safety Systems, Computer Networking Solutions, Audio Visual Systems, Fully Equipped Prefabricated Telecom & Power Shelters, Generators, ATS Panels, HVAC Control Systems, Dual/Redundant ACU Control Panels/Systems, BMS etc.*

*Assuring you of our best attention at all times, our dedicated Team of Professionals will be pleased to discuss your specific requirements and submit detailed information of required products and services.*

*Thank you for your attention and support.*

*Dedication to Environment*

*Customer Satisfaction*

*Risk Management*

*Safety*

*Total Quality Management*

# COMMITMENTS

*On Time Delivery*

*Experienced Solutions*

*Professional Support*

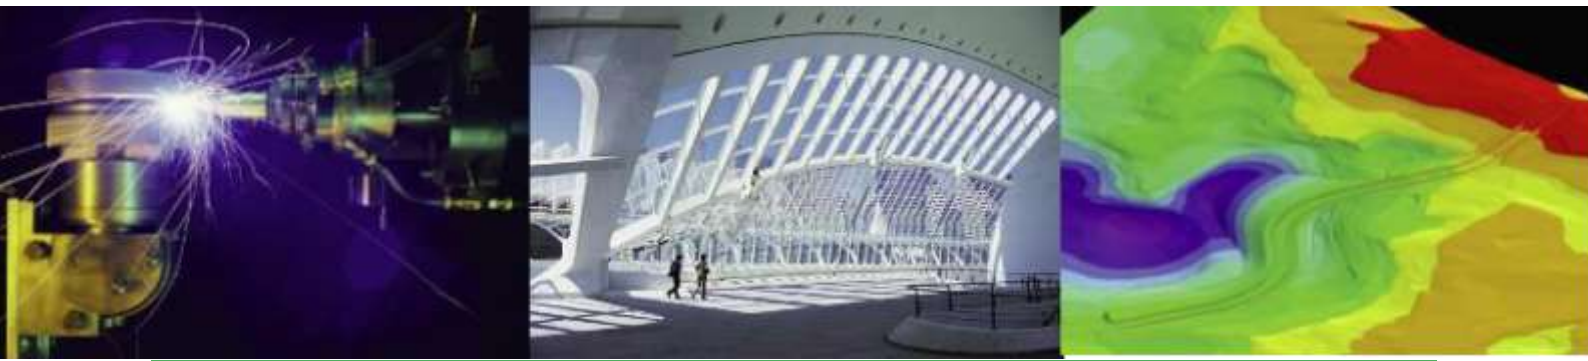

*Long-Term Relationship*

# *Experience*

## **CTS Expertise, Better Results for You**

Need to do more with less? Is the competition gaining on you? Do you have demanding customers? Are your deliveries getting late due power or security issues? **CTS Project Solutions'** team of technical experts knows how to deliver better results for you.

### **Effective Solutions**

Effective project solutions are more than hardware/software. How the IT and Telecom Centers are protected, managed, and maintained in terms of Power and Security is critical to overall success. Only when applications, systems and workflows are effectively secured can you achieve the optimum performance and profitability.

### **Understanding Your Needs**

Recognizing the symptoms of poor performance is first step, the real challenge is solving immediate issues such as power breakdowns. Short-term fixes without a long-term intellectual approach render a false sense of security—a dangerous game in today's competitive market. **CTS Power and Security** experts specialize in diffusing bottlenecks while leveraging solutions that enhance position of your organization for future growth.

### **Altogether Smarter Design**

**CTS** experts focus on how to leverage technology to fulfill your strategic objectives. Typical projects target the productivity benefits of design automation, and include incorporating your business requirements and design standards into the best technology for the job.

Whether offering new systems, enhancing existing systems with proper maintenance or training your technical teams to improve design assets usage and increase your profitably, our experienced engineers help organizations accelerate time to market, reduce costs, and grow profits. **CTS Professionals** will show you new ways to protect your systems.

# Products & Services

*Design, Integration, Supply, Installation, Testing, Commissioning, Maintenance Contracting, after sales support and spare parts service*

**Uninterruptible Power Supply (UPS) Systems:**  
 manufactured by RELIABILITY POWER SYSTEMS  
 rated 1KVA-4MVA  
 applicable in the following area:

- Data Centers
- Financial Services
- Commercial Sector
- Industrial Sector
- Defense Sector
- Hospitals
- Telecommunication Sector

## Long-Life Batteries:

- Maintenance Free/ VRLA
- Design Life upto 25-Years
- Telecom Batteries
- UPS Batteries
- DC Systems Batteries

## Fire Alarm Systems:

- Addressable Systems
- Conventional Systems
- Smoke/ Heat Detectors
- Pull Stations
- Bells & Sounders

## Fire Extinguishing Systems:

- FM200
- CO2
- Vapor
- Handheld Fire extinguishers

## Security & Access Control Systems:

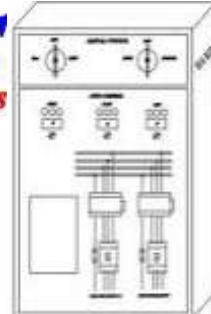

- CCTV, IP & PTZ Cameras
- IR & Security Cameras
- Access Control Systems
- Perimeter Fencing Security

## Control Systems:

Tailored to Customer requirements for:

- Generators ATS & Control Panels
- Data Center Air Conditioning/HVAC
- Battery Paralleling Systems
- Load Transfer Modules/Systems
- UPS External Bypass Panels

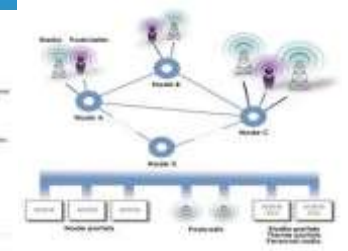

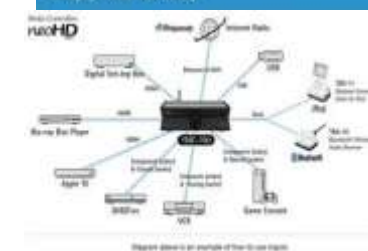

## Remote Monitoring Solutions:

Customized designs for client requirements to provide automated discovery, diagnosis and resolution to technical problems.

Typical applications include:

- Remote/ Extreme Locations
- Telecom Applications
- Aviation Systems

## Generators ranging from 10KVA-2MVA applicable in:

- Industrial & Residential Sector
- Prime Power Applications
- Standby Applications
- Mobile Applications
- Rental Services

## Stabilizers 1KVA-100KVA for:

- Industrial & Residential Sector
- Clean Power & Lightning Protection
- Mobile Applications
- Rental Services

## Audio/Visual Systems:

- Air Traffic Controllers Headsets
- Police & Firefighters Headsets
- Projectors
- Manual Wall Screens
- Automatic/Electric Wall Screens
- Interactive White Boards
- Visualizers

**Prefab Shelter** fully equipped and custom designed for the customer's specific requirements. These shelters can be used for:

- Telecom Systems
- Power Systems
- Equipment Rooms
- Residential
- Aviation Systems

**Load Banks** offer crucial electrical load tests for power sources such as:

- Generators
- UPS Systems
- DC Systems
- Electrical Switchgear

**Fiber Optics** offer and allow much longer intervals of signal transmission due to low attenuation and superior signal integrity. This enables fiber optic to be applicable in:

- Telecom Sector
- Computer & Networking
- Communication Systems
- Aviation Applications

**Solar Systems** offer clean and reliable power and are especially useful in remote locations where Utility Power is not available. Areas of application include:

- Remote Facilities
- Telecom Sector
- Aviation Sector
- Hi-Tech Industry
